PROJECT EXPERIENCE

TMDB Search

Live: <https://movie-search-app-tmdb-project.vercel.app/>

2026

GitHub: <https://github.com/MykytaBurenok/Movie-Search-App>

Project description: application for searching and browsing movies.

Tech stack: React, TypeScript, Vite, TanStack Query, Axios, TMDB API, react-hot-toast

Role: Developer. Frontend Development: built responsive user interfaces using React, TypeScript, and reusable components. Implemented movie search functionality with the TMDB API and handled paginated results with TanStack Query. Used Axios for API requests and react-hot-toast for user feedback. Focused on clean UI, loading and error states, and a smooth user experience. Worked on responsive design, component structure, and code quality to create a polished frontend application.

2026

Weather Dashboard

Live: <https://mykytaburenok.github.io/Weather-Dashboard/>

GitHub: <https://github.com/MykytaBurenok/Weather-Dashboard>

Project description: application for checking current weather and forecasts by city.

Tech stack: HTML, CSS, JavaScript, Open-Meteo API

Role: Developer. Frontend Development: built a responsive weather interface using HTML, CSS, and JavaScript. Implemented city search, current weather display, and forecast rendering with data from the Open-Meteo API. Focused on clean layout, responsive design, and user-friendly interaction.
